

I Respectfully Urge the FCC to OPPOSE HR 4026!!.

I recently had a problem with my XM unit and was forced to listen to the vile broadcasts as well as infinite commercials that flood the airwaves. I choose to pay for satellite radio that offers a far superoir service than over-the -air broadcasts could ever hope to accomplish,including local weather and traffic.

Wasn't this Country built on Free Enterprise?

Now the NAB is feeling threatened because for decades they have not stepped up to the plate & produced a service that could compete with what XM & Sirrius are now offering.

Can Dish Network or DirectTV be far behind?
